We are proud that over the years we have been able to provide customer satisfaction by providing timely and accurate service and accurate and up-to-date information on customer positioning

## SERVICES AND TRANSPORTATION

### Customs services

No matter where your country of origin or destination is, customs clearance is a highly specialized and complex task. Without sufficient experience and knowledge of the laws, current regulations may be difficult and delayed for the entry / export formalities. Being unfamiliar with the customs clearance process can even lead to unnecessary waste of your time / money. The company's long-term expertise and experience enables its customers to benefit from special services based on their wants and demands. And other features of the company can be noted for its high speed in performing all the clearance / administrative work as well as providing consulting services

## Road Carriage

With skilled and experienced staff central office and other offices in provincial capitals and having sufficient and appropriate experience and active branches in Iran's entry and exit markets, Asian and European countries are ready to serve their esteemed clients. In Iran, as in many countries in the world, Road transport is the dominant mode of transport and its share in freight forwarding in the country is about 85%, which alone indicates the importance of Road transport.

### **These are the following Road transportation services of the company**

- Composite and ground transportation services to Iran and vice versa.
- Ground transportation of exhibition goods around the world
- Road transportation of goods to Central Asian countries and vice versa
- Road transport of goods to European countries and vice versa Ground transportation in different ways (retail - lock)
- Road transport of export and import goods for the above purposes Internal and external transit of all Iranian customs
- Unloading and loading operations and dedicated cargo area in active ports and customs of the country with specialized technical staff and modern equipment.
- Experienced and professional technical staff in export, import, customs, clearance and Road transportation
- All loading and unloading operations to the Ex Works destination
- Logistics services
- Freight traffic
- Road transportation of heavy, bulky and bulk cargoes and project operations

## Shipping

Shipping by sea directly from all over the world to all Iranian ports and vice versa

It is capable of shipping freight directly from most ports in the world to Iranian ports and vice versa. In sea freight, the goods are shipped directly to the port of destination without any change of ship or container. In the direct shipping of goods, shipping costs are much less economical and shipment time shorter. The company has sufficient and brilliant experience in shipping freight in a direct and specialized way from all ports of Asian countries such as China, India and ... Also all European ports offer special services and competitive prices.

### **The following are examples of the maritime transport we have experience and knowledge of:**

- **Shipping by Cross Stuffing**

Shipping by sea from a port that cannot be shipped directly to Iran. In this way, shipping containers are shipped from one ship to another, usually cross stuffing in Jebel Ali.

- **Shipping by Transshipment**

For ports where freight shipping is not direct from there, the transfer flow is often accompanied by unloading and reloading.

- **Shipping by Groupage and Project**

With extensive facilities in the maritime transport area, it is able to provide reliable and special services for shipping by sea, as well as shipping by export and import cargo as a

group and project. Has the same weight and volume as a group and project from Iran to other parts of the world and vice versa

- **Shipping by bulk & Chartering**

Bulk merchandise is merchandise that ships without any packaging such as flour, sugar, cotton, cereals, stone, iron, cement, sugar, minerals, phosphate, coal, etc.

- **Shipping by with refrigerated container**

It is able to provide refrigerated services in the form of trucks and marine. In the case of marine transport of perishable goods such as fish, shrimp and etc.
